Some of Your Competitors Just Eliminated Bolt Tightening Problems

On the line or in the lab, the industry leaders are automatically verifying bolted joint assembly without strain gages, grinding or other bolt conditioning. They'll keep their production savings and product improvements secret. But we have the technology for you to do the same.

Bolting for the Automotive Industry Raymond Ultrasonic

Bolt Measurement Systems were specifically developed for your industry. These microprocessor-based systems read, compute, store and compare bolt stretch to .00001", during or after tightening. The Raymond Fast Update Monitor eliminates strain gages by providing real-time data at up to 200 per second. The Production Line Verification System automatically adjusts for different bolts and works with unconditioned bolts right on the assembly line. And our handheld, touch-operated BoltMaster displays only the choices your operator needs to make for accurate bolted joint measurement.

Get Competitive. Get Raymond.

Let us help eliminate your bolting problems. Just call our Bolting Information Hotline: 1-800-243-2466

217 Smith Street, Middletown, CT 06457 203-632-1000 Telex: 9-9394 TWX: 710-428-7944

ESSENTIAL FEATURES FOR YOUR NEXT FFT

- 1. DC OPERATION**
for safety and convenience.
- 2. INPUT ISOLATION**
for improved S/N ratio
- 3. 100 kHz RESPONSE**
for transients and higher RPM orders

Enhance the accuracy, convenience and versatility of spectrum analysis. Specify our new CF-360 2-Channel FFT (DC operation now also available in the popular CF-350).

Get full laboratory capability. From a portable analyzer that seldom needs signal amplification or hardcopy recording in the field. Call today.

(312) 595-9292.

1989 SAE GOVERNMENT/INDUSTRY MEETING

May 2-5 • Loews L'Enfant Plaza • Washington, DC

Theme: "Government/Industry Roles in Advancing Mobility"

* Over 30 informative technical sessions on topics such as:

Fuel Economy
Global Warming
U.S./Canada Free Trade Agreement
Foreign Investment in the U.S. Auto Industry
Clean Air Act
School Bus Safety
Passenger Car Size vs. Occupant Safety
Evaporative Emissions

For more details on this meeting and to receive a free final meeting program, call or write Debra Jakub at SAE World Headquarters, Dept. 940, 400 Commonwealth Drive, Warrendale, PA 15096-0001, (412) 772-7131, telex number 866-366.

89-0020MAC

* Keynote Address by U.S. Senator John D. Rockefeller

Join key government and automotive industry officials to discuss current problems and address issues facing the industry today.

Plan NOW to attend!

1989 SAE International Off-Highway and Powerplant Congress and Exposition

September 11 - 14 • MECCA • Milwaukee, Wisconsin

Plan to be in Milwaukee for this world-class Off-Highway Congress and Exposition. Over 5,000 engineers designers and executives from off-highway equipment manufacturers world wide will be in attendance. Over 200 companies will exhibit the newest products and services available to the industry. If this industry is a market for your company, consider having an exhibit. Plan now to be in Milwaukee in September.

For details about attending or exhibiting return this coupon or call Ed Kinne at 412/772-7152.

PLANNING A PROFESSIONAL MOVE?

If you are thinking about making a professional move, SAE's Engineers Available Through SAE Bulletin can help you put your experience, qualifications, and professional goals in the hands of automotive manufacturing and supplier companies that have staff needs.

THREE-MONTH LISTING

Your listing in the Bulletin will appear for three consecutive months and is renewable, after a one-month interval, for additional three-month periods. Your listing will include your field of interest, preferred geographic location, desired salary range, and experience summary.

COMPLETELY CONFIDENTIAL

The Bulletin is a completely confidential service. Your name and address will be released to only those companies requesting it, and they will communicate directly with you. Under no circumstance will it be released to your current employer.

ABSOLUTELY FREE

Listing in the Engineers Available Through SAE Bulletin is a free member service. Companies receiving the Bulletin pay a \$24/year subscription fee.

HOW TO LIST

Forms for listing in the Bulletin will be sent to you upon request. Complete the form below and mail it to the Engineering Resources Committee at SAE Headquarters, or phone Claudia Ross at 412/772-7142.

I wish to list in the Engineers Available Through SAE Bulletin. Please send the forms to me at the following address:

Product Testing . . . Your engineering solution.

From routine analyses to unique testing programs, Detroit Testing Laboratory, Inc. (DTL) will work with you to achieve product quality through testing.

Since 1903, DTL has been a nationally recognized and accredited independent source of testing and engineering services for leading firms in the automotive, aerospace, electronics and consumer product industries.

For your product testing needs, DTL offers comprehensive test services in the following technical fields:

- Electrical/Electronics
- EMI/EMC
- Environmental Simulation
- Fuel System Testing
- Materials Testing
- Mechanical Testing
- Metallurgy
- Nondestructive Testing
- Photometry/Spectroradiometry
- Safety Labeling and Certification
- Vibration/Shock

For your testing needs, make DTL part of your team!

VideoProbe™ 2000

For Remote Visual Inspections

Welch Allyn's VideoProbe 2000 handles a wide range of applications, from aviation to power generation, from petrochemical and weld inspections to failure analysis.

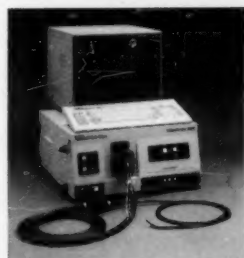

Our Focus is Your Application.

Depend on it: Welch Allyn manufactures the most versatile, durable, cost-effective visual inspection systems on the market. Whatever your application problem, our standard and custom product lines offer the solution that works. Rely on VideoProbe 2000's superlative microelectronic engineering to meet your individual visual inspection needs.

The best the industry has to offer.

- **Versatile**—variety of probe lengths and diameters
- **Durable**—no fragile fibers to degrade image
- **Crystal clear**—clearest image in the visual inspection market
- **Cost-effective**—automatic focus saves time, expense

Contact your Welch Allyn representative today for a demonstration of your visual inspection solution.
